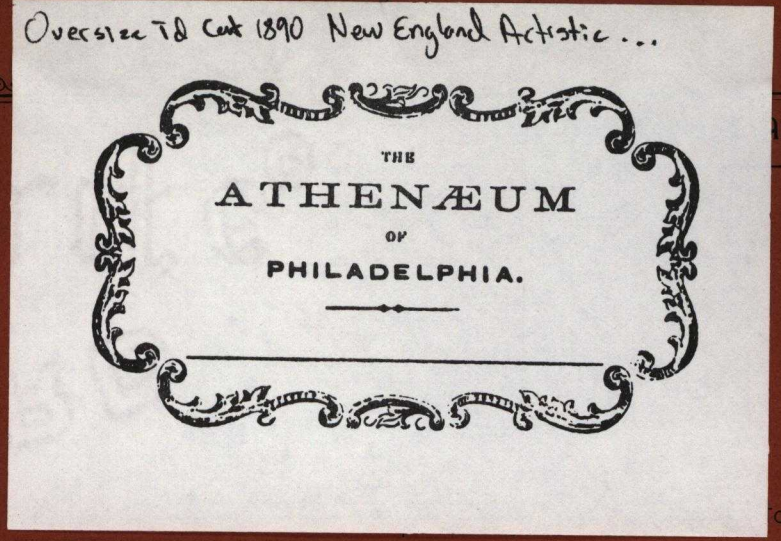
PRINTED BY SAMUEL USHER, BOSTON, MASS.

Oversize TD Cat 1890 New England Artistic ...



...rtistic Carving Company.

FEBRUARY 1, 1890.

...o the trade, we regret our inability to make it complete in all its branches, and solicit correspondence in regard to Newels, Posts, Columns, Table and Chair Legs; Fancy Mouldings for Furniture, Picture Frames, and Looking Glasses; Electrical Work, etc., either in Round, Square, Octagonal, or other fancy forms.

We wish to thank you for the favors of the past, and shall endeavor to warrant a continuance of them both by the QUALITY OF OUR WORK and by our ATTENTION TO YOUR WISHES. We are

Very respectfully yours,

J. RUSH GREEN, PRESIDENT.
S. P. MOSES, TREASURER.
LAWRENCE WHITCOMB, MANAGER.

The New England Artistic Carving Co.

pur. S. Emer 8/87

$150

To the Architect:

ROUND TURNING.

We take pleasure in calling your attention to our extensive business in all classes of Wood Turning. We are in position to produce the best work at low figures — in fact, others cannot compete with us for quality of work at our prices.

A selection from our Catalogue will insure your client a more perfect round Baluster for either exterior or interior work than can be had elsewhere, at two thirds the ordinary cost, each one exact in every dimension and detail.

The best stairbuilders pronounce our work superior to hand work, and we should be pleased to prove the same by sending you samples.

SQUARE, OCTAGONAL, AND FANCY TURNING.

Heretofore it has not been practical to carry out one's ideas in Balusters, Columns, Posts, etc., in square, octagonal, or fancy shapes, but our machines make it possible to procure these turnings in beautiful and delicate design, such as can be produced by no other known machinery, and superior to the finest hand work, at a comparatively nominal cost.

We have endeavored to bring the price within the reach of all who wish a really fine and effective hallway, and by the various combination of styles and designs, to say nothing of the effect that can be gained by using round, square, and octagonal together in the same flight, endless effects are possible with our regular designs as represented in this Catalogue.

We can give you your own design when quantity or price warrants the outlay for the necessary knives.

PAP v04-0817
11/16/2004
Td Cat
1890
New...

We can also produce many styles of work not illustrated in this Catalogue, for while we to-day make no twisted work, we expect to show you shortly twists running around square, oval, and octagonal Balusters, and a great variety of smaller work more on the order of carving.

To the Contractor:

With our facilities both for hand and machine work, we can give you lowest prices for the best work, and solicit your trade.

To the Carpenter:

If you build your own stairs, order of us. If not, then order your columns and piazza balusters of us. We can supply you with the cheapest and those of highest cost, and our prices are always very low for the style and quality of the work.

To the Stairbuilder:

Our balusters are easy to finish, never vary in detail or diameter, as they are made to a gauge, can be had at short notice, and by using our Catalogue and Price List you can at once see what you order and the cost of same.

When called upon for a nice job, use our best styles of fancy turned balusters.

To the Dealer:

If you carry a line of goods similar to ours, send for our prices in large lots to the trade. Ours are not only the best, but the cheapest.

THE following parties carry a stock of our goods, and can furnish them at short notice and at list prices.

J. W. Bailey & Sons Co.,	Boston, Mass.

Read these Notes • • •

Our Balusters run 32 inches and 28 inches long, called long and short Balusters, and unless otherwise specified we send one quarter short.

On round-turned Balusters we do not sand the squares, except when ordered at an additional cost of one cent each.

Our fancy work is hand-sanded throughout.

We cannot promise to fill all orders at a moment's notice, so give us all the time you can, say two weeks for fancy turning, and one week for the round.

Our Balusters are made with seven-eighths dowel, and variations from this rule may cause delay, but we can give you dovetail or larger dowel if you wish.

We make our Balusters $1\frac{3}{8}$, $1\frac{5}{8}$, $1\frac{7}{8}$, *and* $2\frac{1}{4}$ *inches net. Be sure and specify which you want. And when selecting, don't fail to refer to Price List to see if we make that style in the size you wish.*

Do not lose this Catalogue, as goods should be ordered by numbers to avoid mistakes.

Architects' designs and every style of hand turning at short notice.

We specify throughout our Catalogue the length of moulding in each Buluster, to aid you in deciding what to order.

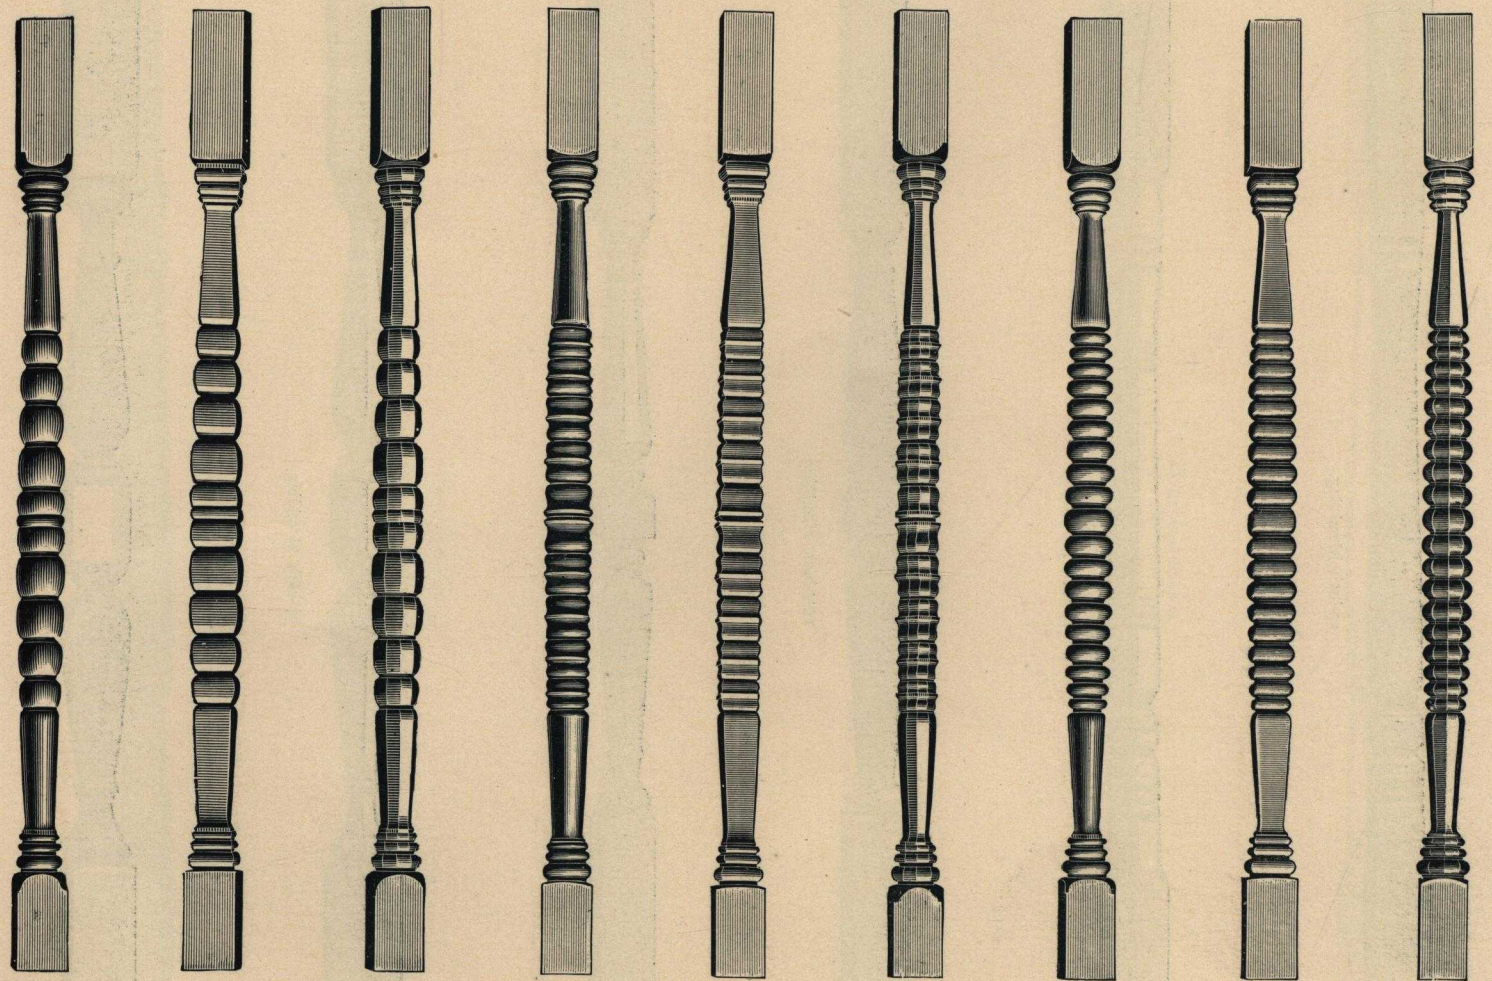
OUR FANCY TURNING.



No. 28—1. No. 28—4. No. 28—8. No. 29—1. No. 29—4. No. 29—8. No. 30—1. No. 30—4. No. 30—8.

The length of Moulding on these Balusters is 20 inches.

These Balusters can be used in any combination of design and turning, as mouldings are the same in each.

Difference in length can come either in top or base, but in those we carry in stock the difference is in the base.

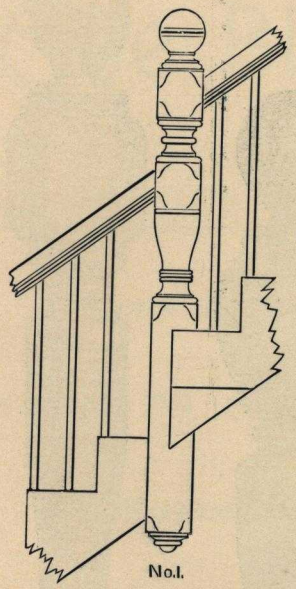
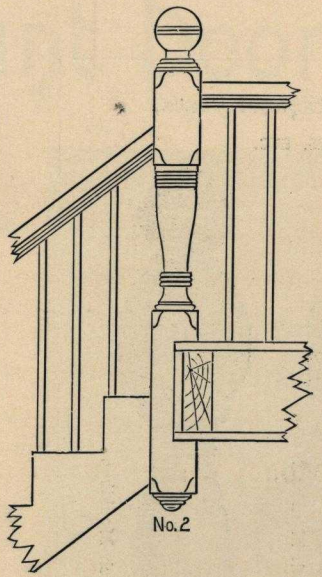
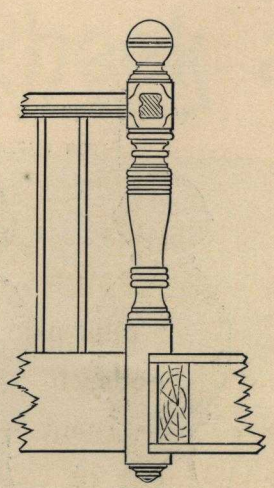
ANGLE POSTS AND NEWELS.



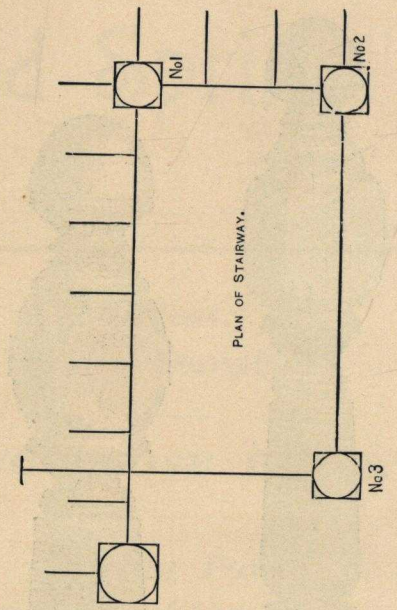
No.1.



No.2



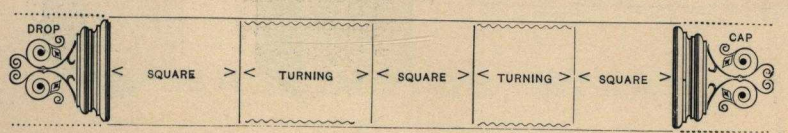
No.3.



We frequently have our customers order regular lengths of **starting newels**, which they intend to use for angle posts. This will only lead to a disappointment, as they are unsuitable, for the reason that in most cases the angle post must receive more than one rail, at different heights, necessitating either **longer squares**, or, when more than one riser enters the base, **two squares, separated by turning**, and they are **generally much longer.** The position of these squares changes with every variation of pitch of stairway.

We show above a plan of stairway, with suitable **Angle Posts** for the same, in elevation. It will be observed that **no two of these are alike**, one of them requiring to be over six feet long.

They should be laid out by an experienced stairbuilder, and a rough sketch sent us, with the necessary lengths between the points marked, thus: —



They can be turned any pattern that may be selected, the cost depending on the amount of turning, their length, and kind of wood.

We will lay them out if desired.

FOR THIS WE REQUIRE:

1. Plan of stairway, showing face-line of stringboard and the positions of risers and newels.
2. Rise and tread of steps as sawed out on the stringboard.
3. Depth of deadwood of stringer.
4. Depth of floor timbers, including under floor and furring of ceiling.
5. Width and depth of rail to be used.
6. Size of posts required, kind of wood, whether we are to clean up the squares and furnish rosettes.

We must have either the rough sketch with dimensions, or **all** these particulars, as without either it will be **impossible** for us to execute orders.

TERMS

Cash in thirty days to parties of approved credit.

As an **EXTRA INDUCEMENT** for prompt cash, two per cent. may be deducted from all bills paid on delivery.

Strangers ordering goods, to avoid unnecessary delay, will please give city references, or remit by Check, Express, or P. O. Money Order.

Please send Postal Note or Express Money Order for all charges of less than Five Dollars.

If the above is not complied with, goods will be sent C. O. D.

Boxing will be charged extra, when required for the protection of goods.

DISCOUNTS.

In lots of 100 or over, 10 per cent. discount from List.
In lots of 500 or over, 15 per cent. discount from List.
In lots of 1,000 or over, 20 per cent. discount from List.

To secure the above discount, goods must be all of one style number, one style of turning, and same kind of stock.
